1. I loved this lab course! When I was questionable at least it was easy for me to go ask any question to Dr. Hennessy. She was an awesome lab instructor with great communication skills. I would definitely take another class with her.

2. Professor is very knowledgeable and friendly. Provides excellent feedback on lab assignments. Labs were well run and appropriate.

3. Dr. Hennessy was the best lab teacher I could have asked for! She makes the course fun and I learned a lot. Please offer her a permanent position!

4. Dr. Hennessy is a really great professor considering it is her first semester teaching. She is very approachable and doesn’t talk down to students, which is extremely appreciated. Definitely wish she would stay after this year.

5. I really liked this course. It was well organized and easy to follow.

6. This laboratory course was very interesting and I learned a lot of new things.

7. This course was very informative especially for someone who has not been exposed to biology in over a decade. Very enjoyable course.

8. Dr. Hennessy is a great instructor. She encourages work ethic and stays in touch with the students when it comes to assignment feedback. One thing that I can think of that might need work is her patience when it comes to the understanding of an assignment. I’ve seen her improve in that aspect even through the course of this semester. Just a little more patience though, and she would be probably one of the best professors on campus.

9. This laboratory course was fun and easy to follow. The professor kindly helped students understand any issues. The professor was very easy to understand when explaining any lab directions. I would highly recommend students taking this lab course with Dr. Hennessy!
