Instructor: Hennessy, Cecilia

Meeting Times: TUE 8:00am-9:15am, THU 8:00am-9:15am

Number of Students enrolled in the course section = 29
Number of Students completing the evaluation = 18

Qualitative Portion

1. What did you like most about this class?
   Getting to know the new professor
   Getting very in depth with such a touchy subject and see it be applied to different concepts like race and religion
   How interactive our instructor was. I also noticed how passionate she is for the subject and biology its self which is always inspiring. She was a very, very great instructor. Also, the labs were usually quite fun.
   it was fun at times
I liked how she got us involved during class and working with other peers.
Interesting topics about evolution
How dedicated she was to her subject
that we actually learned something
I enjoyed the teachers easy going personality.
Homework assignment type
the professor, she was fantastic. I loved that she had so much enthusiasm
It cleared up all of the misunderstandings that high school taught about the subject
Gaining new information withing my major
I liked how it really made me think about where we actually came from
It was educational

2. What did you like least about this class?
   It was an 8:00 AM Tests were pretty difficult
   That it was biology at 8 AM.
   well, i had the 8 am class, so that wasn't fun. But I'd have to say the size of the powerpoints. Some there was around 17 slides and one there was around 60 slides.
   I'd say try to make them more consistent if you can. If you have to, split the 60-slide ones up into smaller ones. I just think it'll be less for us to take in
   The books are very hard to comprehend
   How the class never really interacted with each other
   that it was at 8 am
   I didn't like the time slot at all.
   the books that went along with this class, they were hard to understand the subjects that went along with this class
   The labs and the time
   the fact it happened at 8 AM
   it was at 8am
   Time of class (8:00AM)
   How it was at 8 in the morning
   It was an 8 am

3. How did you contribute to the learning experience?
   Doing homework Taking notes Participation in discussions
   I read the texts and did the work that needed to be done.
   We did a lot of group teach activities. Also I did my readings.
   Did the reading
   Looking over power points.
   I tried to share with my classmates about me
   participated in class
   I participated in class and did mostly every assignment.
   i didn't
   I tried to always participate in class
   Doing assignments and quizes
   I went to class everyday and tried my best to participate
   I answered questions

4. What would you do different if you took the course again?
   Probably nothing
   Prepare myself to be able to make coffee every morning.
   do all the three questions assignments. I didn't really understand for the first two, so I didn't do them
   I would have started out stronger than I did.
   Spend more time studying
   Study more
   Try to get more online sources to better understand the material
   I would do every assignment no matter what, and study harder.
   Study more
Go to class
read the chapters the night before the class rather than multiple nights before the class
Different time of day
I would definitely read the readings she provided us and studied a little bit harder
Find a better way to study

5. Please evaluate the instructor’s strengths.
It clearly took her a while to get into the swing of things but once she did the class really started to feel like it was flowing well. She had us watch videos that were interesting and applied the course to a lot of different concepts Had great ways to get everyone involved Made labs enjoyable
Was really good at getting the class to be interactive and work together.
She is very good at Lecturing so it doesn't feel so much like a lecture.
Helped make sure students
Enjoys her subject
she enforced her lessons with other material that added to the criteria she was teaching
She relates to her students easily.

Definitely knows information and is passionate about the subject

Very intelligent, nice, organized.
This professor is excellent and very accommodating. I was able to be the most successful in this class due to her taking the time to make sure I understood the material and did not fall behind over the course of the semester.
taught in a way that people with no scientific understanding or background could understand
Very passionate about what she is teaching, encouraged us to work as groups.
She did good at teaching the information to us and getting us involved so we were not just sitting there listening to her talk for a hour and a half.
She is fair and wants us to pass

6. Please evaluate the instructor’s weaknesses.
Can be a bit emotional but it comes from a place that means well Refused to teach class one day because some students chose not to do the reading. I understand where she was coming from but we pay a lot of money for these classes.
Was a bit too fast with some of the slides due to a lot of information on some of them, which results in longer note taking time.
sometimes you moved too fast through the powerpoint. I suggest before you move on, ask if everyone got everything. Because not everyone will speak up when you move on and they're not done, but there's a slightly higher chance of them speaking up if you ask.

Her weakness is in her naming for her assignments. In class I get so confused by what assignment she is talking about because 2 of them are so close together in name.

Spoke very quickly
Doesn't quite make the material relatable to students and tended to be unprofessional
shot down many theories that did not pertain to evolution. SHes tried to with hold bias from our lectures but it was easy to tell that
The instructor had no weak points. She was the shit.
Sometimes she got a little biased, but other than that she was good.
None

For final, I felt as if we should have had study time in class or a study guide.
There was no weakness with this instructor

She doesn't try to teach unbiased

7. What were the most important takeaways (key skills or concepts) from the class?
We got very, very in depth with evolution and even went as detailed as to learn about race and religion as well
A lot of material from the texts.
I have learned a lot about how we have become the way we are in today's world.
Note taking with a lot of information The foundation of evolution
How to summarise and explain material
got to learn about concepts that contrast with what I believe
The most important takeaways I got out of this class was that evolution is so much more than what most of society believes. It so much deeper.
Evolution is true
I loved learning about human evolution
Addressed opposing views and educated us without forcing opinions on us
Basic evolution history, and detailed history.
Every single thing that we learned about revolved around evolution.
Science and religion don't have to disagree

8. Were there any additional circumstances that influenced your experience in this classroom? (i.e. heat in classroom, other students in classroom, time slot, etc.)

Technical issues with our main classroom caused us to have to switch rooms
Biology at 8 AM is never fun.
I personally think that if I had this class later in the day I would have been able to pay attention more. A lot of tough material to try to comprehend at 8am.
8am class made it difficult to pay attention in the morning
The time slot was always pretty inconvenient
the teacher had trouble getting the projector to work
It was hard waking up that early and going to a lab right after class.
I hated that it was an 8AM
it was at 8am

Time slot
I did not like how it was at 8 in the morning

No
